

The **ELLIPSE** model is a very silent motorized screen, thanks to the Somfy® motor used in it. The cabinet and the counterweight are entirely made of aluminium, treated with white epoxy powders (RAL 9010), while the iron sides of the cabinet are black.

We use PVC cloths suitable both for frontal projection and for rear projection. All these cloths are flame-retardant, classification M1 7201-96.

ELLIPSE fits properly in a/v professional applications like meeting and conference rooms or classrooms.

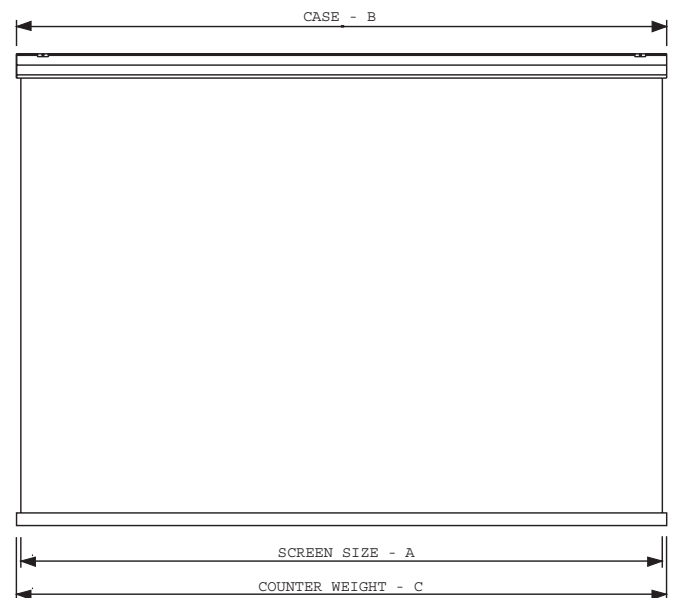

Ellipse Professional with three black borders (optional)

Wall or ceiling brackets and switcher (included)

Remote control with integrated receiver (optional)
